- **WARNING! SHUT POWER OFF AT FUSE OR CIRCUIT BREAKER.**
- **ATTENTION! COUPER LE COURANT AU FUSIBLE OU UN DISJONCTEUR.**

ASSEMBLING THE FIXTURE (Fig.1)

1. Shut off the power at the circuit breaker box. Remove old fixture and all hardware from Junction Box.

2. Carefully unpack your new fixture and lay out all the parts on a clear area. Take care not to lose any small parts necessary for installation.

3. Thread the two mounting screws about 1/4” into the pre-drilled holes in the mounting plate spaced the same distance apart as the holes in the lamp body (A).

4. Attach the mounting plate to the Junction Box with the two Junction Box Screws as shown. The side of the mounting plate marked "GND" must face out. **The junction box is not included.**

5. Attach the lamp body(A) into the shade(C), lock it securely with the check ring(D).

6. Install the light bulb(not included) in accordance with the fixture specifications. **NOTE: DO NOT EXCEED THE SPECIFIED WATTAGE!**

7. While holding the shade assembly towards the ceiling, connect the electrical wires as Shown in **Fig.2**, making sure that all wire nuts are secured. You may have to wrap the connections with electrical tape. If your junction box has a ground wire (green or bare copper), connect the fixture ground wire to it. Otherwise connect fixture’s ground wire directly to the mounting plate with the green screw provided. After wires are connected, tuck them carefully inside the Junction Box.

8. Raise the shade assembly onto the junction box, aligning screws on mounting plate with mounting holes in lamp body(A) and lock it securely with the nuts (B).

Your installation is now complete. Return power to the junction box and test the fixture.
