- **WARNING! SHUT POWER OFF AT FUSE OR CIRCUIT BREAKER.**
- **ATTENTION! COUPER LE COURANT AU FUSIBLE OU UN DISJONCTEUR.**

ASSEMBLING THE FIXTURE (Fig.1)

1. Shut off the power at the circuit breaker box. Remove old fixture and all hardware from Junction Box. Carefully unpack your new fixture and lay out all the parts on a clear area. Take care not to lose any small parts necessary for installation.
2. Thread the two mounting screws about 1/4” into the pre-drilled holes in the mounting plate, spaced about the same distance apart as the holes in the fixture back plate. Attach the mounting plate to the junction box using two junction box screws as shown. **The side of the single bar marked “GND” must face out.** The junction box is not included.
3. Follow wiring instructions carefully(see fig.2).
4. Install the light bulb(Not included) in accordance with the fixture’s specifications. **DO NOT EXCEED THE MAXIMUM WATTAGE RATING!**
5. Raise the back plate(A) onto the mounting plate, aligning the mounting holes with mounting screws, then lock it securely with the ball nuts(B).
6. Raise the shade(C) onto the back plate(A), aligning the top and bottom screw holes, then lock it securely with the screws(D).

CONNECTING THE WIRES (Fig.2)

1. Connect the electrical wires as follows. Connect the Black wire from the fixture to the black house (hot) Wire. Connect the white wire from the fixture to the white (neutral) house wire. Make sure all wire nuts are secured. You may wrap the connections with electrical tape. If your outlet box has a ground wires (green or bare copper) connect fixture’s ground wire to it. Otherwise attach the bare copper fixture wire to the green ground screw on the mounting plate.
2. Tuck the wire connections neatly into the wall junction box.

Your installation is now complete. Return power to the junction box and test the fixture.
